

## Read Me File

1. Open one of the three files. Suppose you open “shakib\_run\_predictor\_mlr.py” file.
2. After you open the file, upload the excel file (“Shakib.csv”) in the coding environment. I used to google collab.
3. In the toolbar, go to the option that says “Runtime” and then choose the option “run all.”

All the files can be find the find in the zipped folder named “Final AI Project – Rahman, Fida”
